Introduction

1.1 How to cite

Use **parencite** to do a standard citation, e.g. (Elliott, 2016). Each chapter in this thesis template is self-contained in that each chapter has its own bibliography.

1.2 Glossary

Optional. You can add entries into **frontmatter/glossary.tex**. Each entry must be referenced at least once using the **gls** command. Here's an example:

I want the word 'Climate Model' in the glossary.

1.3 Acronyms

Same as above. Entries added into **frontmatter/acronyms.tex**. An example: the Intergovernmental Panel on Climate Change can be input in long-form or short-form IPCC.
